

Indian Futures

IT Community Centres
2025/2026

The Mission

We provide quality education and funding to communities in rural South India in order to create a wider range of opportunities and help reduce the gender imbalance.

Our Theory of Change

We envisage a world where everyone has access to quality education.

Digitalisation of education is one of the keys to this challenge, as it solves problems in rural schools such as inadequate student-teacher ratios and insufficient teaching resources.

What we do

In order to meet this challenge,
Indian Futures has created
3 IT Community Centres.

Our Impact

Since our IT centres opened...

- **122** students between the ages of 5 and 14 attended our 3 IT Community Centres in their first year (2019/20). By March 2025, a total of **573** have benefited from learning new IT skills.
- **90%** of our IT students achieved the desired level of understanding and handling of IT software.
- **All** our IT students showed a higher level of understanding and handling of IT software than those not attending the centres.

Our Goals

- 1) Open our IT centres to the entire community.
- 2) Improve our centres, with better facilities and more specialised IT teachers' training.

What we need

In order to achieve our goals, in the school year 2025/26 we need a total of £5,500.

This covers the costs of:

- 2 new laptops,
- 50% of refurbishment works in two of the centres, including a new roof, floor tiling and new windows.

We also need advice on IT educational programmes, software and teachers' training, and locally sourced IT equipment (Tamil Nadu).
