Rethinking IT

In the previous eBulletin we let you know that our recent visit to India had made us rethink our approach to increasing IT access in rural Tamil Nadu.

When reflecting on the project with our partners we considered two main points:

1) The quality of the digital and other educational tools

2) The quality of the learning facilities.

We decided that, rather than carrying out small-scale improvements across all three centres, in 2027 we will focus our resources on strengthening the facilities at one centre. By concentrating our efforts, we can achieve the quality standards we aspire to and create a model that can be replicated at the other centres.

UK News

Feel Good Event

Meanwhile, in the UK, we have restarted our community events at Robert Lodge.

Last Saturday we held another edition of our popular spoken word event, Feel Good — a fitting name for an afternoon full of creativity, connection and good vibes. Alongside poetry and music, beautifully brought to life by Alanna, Jo, Roger, Steve, Nel and Emma, we also had artwork, meditation and massage activities, plus our ever-exciting raffle to round off a feel-good afternoon.

The event raised the wonderful amount of £606!
