

Sponsorship Programme Campaign for 2023/24

Our Sponsorship Programme funds the university fees and transport of a total of 14 young women from rural India.

We are looking for Sponsors for the new year starting in August.

Investing in women is investing in progress

Their education goes far beyond the classroom's walls; it gets passed on to their siblings, children and grandchildren, gives them a voice within their community and leads to a more balanced, varied, multi-skilled workforce. It reduces gender inequality at all levels of society.

It costs:

£45 a month to become a Sponsor - we encourage group Sponsorship so you can share expenses with friends and/or relatives!

£20 a month for university fees

£15 a month for transport to/from university

£5 a month for university books and materials

To become a Sponsor, a monthly-donor or a one-off donor, please click the link under our signature.

Accenture Partnership

In order to increase the university student's confidence, skills and employability, Indian Futures partners with Accenture to provide a Mentoring Programme, which they complete during their studies.

To mark the beginning of the academic year and present the Mentoring Programme to our students, Indian Futures and Accenture organise a yearly Sponsorship Day Event in Vedanthangal, a rural area some 80kms from Chennai, where most of the students live.

The programme is divided into 4 modules:

- Tactical English Speaking
- Personal Development
- IT and CV Writing
- Careers' Advice

The modules are taught online, with each student's progress being assessed. They will then meet together for a prize-giving ceremony to celebrate their hard work and achievements.

Last year, the English Assessment showed an increase between 40-80% in the students' level of English since the start of the course.
